PROFILE

Since 2020 working in software engineering **with several years of experience focused on Mobile/Android/Kotlin and backend systems with Spring Boot (Java) and .NET Core (C#)**. I take ownership of technical decisions, legacy stack migrations, and the delivery of robust, scalable solutions from conception to product release.

PROFESSIONAL EXPERIENCE

Senior Android Developer / C# Developer

January 2025 – January 2026

GastroSoft GmbH – On-site / Krefeld

- **Development of a new point-of-sale (POS) system for the German, Austrian, and Swiss markets:** New development of a POS app and implementation of functionalities for session/authentication system, product loading and table reservation, payment system integration, offline mode, database backup, and receipt printing.
- **Architecture & Code Quality:** Built the app following MVVM architecture with Jetpack Compose and Kotlin Coroutines/Flow to ensure a clear separation of UI, business logic, and data layer, improving long-term maintainability.
- **Cloud API & License Management:** Developed a Cloud API client using GraphQL for data synchronization, and implemented license verification logic via GraphQL mutations, including handling success and error scenarios.
- **Security & Offline-First:** Implemented a local database (RoomDB) to ensure offline-first functionality.
- **Teamwork & Backend Integration:** Extended C# interfaces with ASP.NET Core and Entity Framework for specific business rules; collaborated closely with the team to define shared API interfaces and conducted code reviews.
- **Quality Assurance & Testing:** Introduced unit and integration tests for critical workflows (e.g., payment processing, data synchronization), which reduced production-relevant bugs post-launch.
- **Go-To-Market & Operations:** Successfully launched on the Google Play Store, including continuous app monitoring via Google Analytics and Firebase Crashlytics.

Tech: Kotlin, Jetpack Compose, Coroutines, RoomDB, MVVM, GraphQL, Firebase, Google Play | C# ASP.NET Core, EF Core, Git, Azure Repos

Android Developer

March 2022 – September 2024

Veeuze GmbH – Hybrid / Wesel

- **Responsibility & Ownership:** Worked as the primary Android developer in the mobile app team for nearly three years, responsible for the development, planning, and maintenance of multiple Android projects for various clients.
- **Product Development & AR Features:** Designed and developed specialized Android apps for virtual 3D object positioning using ARCore as well as real-time color visualization on surfaces. Implemented using Kotlin, Java, OpenGL, and Jetpack Libraries.
- **Effort Estimation & Planning:** Created time estimates for new features within the Sprint workflow to support realistic planning and punctual delivery.
- **Knowledge Transfer & Mentoring:** Guided a junior colleague through regular pair programming and imparted best practices in Android development.
- **IoT & Hardware Integration:** Seamlessly integrated multiple Bluetooth-based color sensors for precise on-site capture and digitization of object colors.
- **Testing & App Releases:** Implemented UI and unit tests to improve code quality, performed internal testing, and released apps via the Google Play Console (Internal Testing & Production Rollout).

Tech: Java, Kotlin, MVVM, Compose, Bluetooth BLE, REST APIs, Retrofit, ARCore, 3D, Navigation Component, Coroutines, Gradle, Espresso, JUnit, Git

Android Developer

October 2020 – December 2021

Chari.co – Remote / Tangier

- **E-Commerce app & B2B Platform:** Developed and redesigned a central B2B e-commerce app for retailers featuring a dynamic product catalog and promotional offers for order processing and user engagement.
- **Logistics & Real-Time Tracking:** Designed and developed a dedicated package delivery management app using the Google Maps API for optimal courier routing, alongside a real-time monitoring dashboard for administrators.
- **Cross-Platform Development:** Developed additional internal applications using Flutter for faster delivery of cross-platform features alongside native Android apps.

Tech: Java, Kotlin, MVVM, Google Maps, REST APIs, Retrofit, Flutter, Git

Junior Java Developer

February 2020 – July 2020

VirtuoCode – Remote / Tanger

- **SaaS Web Development:** Built a cloud-based SaaS platform for automated evaluation of business models and optimization of advertising campaigns for startups.
- **Backend & Database System:** Implemented robust backend services and RESTful APIs with Spring Boot, Spring MVC, and Hibernate/MongoDB for flexible data processing.
- **Cloud & Deployment:** Containerized the application using Docker to ensure a consistent development and deployment environment, and for communication with Google Cloud Services.

Tech: Java, Spring Boot, MVC, Hibernate, MongoDB, Docker, JavaScript, Google Cloud Platform (GCP)

EDUCATION

Master of Science, Computer and Mobile Systems (MSc)

September 2018 – July 2020

Faculty of Science and Technology, Abdelmalek Essaâdi University

Focus: Mobile, Linux & Cloud Systems

Bachelor of Science, Mathematics and Computer Science (BSc)

September 2014 – July 2018

Faculty of Science and Technology, Abdelmalek Essaâdi University

Focus: OOP, Linux, Relational Databases

CORE SKILLS

Mobile: Android SDK, Kotlin, Java, Flutter, Jetpack Compose, MVVM, Clean Architecture, Coroutines/Flow/LiveData, Dagger Hilt, Koin (Dependency Injection), Room, Retrofit.

Backend: Java, Spring Boot, Spring Security, Ktor, JWT, REST API, GraphQL, C#, EF Core, .NET Core.

Cloud & DevOps: AWS Cloud, Docker, CI/CD Pipelines, GitHub Actions, Bitrise, Firebase, Azure DevOps.

Build Tools & Data Formats: Gradle, Maven, JSON, YAML, XML, Shell Scripting (Bash).

Workflow & Automation: n8n, Zapier, HubSpot, SEO, E-Mail Marketing.

AI Agents: Cursor, Claude Code, Copilot, Gemini Agent.

CERTIFICATIONS

- AWS Certified DevOps Engineer Professional Course (July 2026)
- Google AI Professional Certificate (March 2026)
- Backend Developer at AIESEC Morocco as a volunteer (February 2021)
- IBM Cloud Application Developer (September 2020)
- DevOps Essentials Professional Certificate (July 2020)
- IBM IoT Cloud Developer Mastery Award (October 2019)
- IBM Application Security Engineer Mastery Award (May 2019)
- Android Development Udacity Track (November 2018)
