City

Mönchengladbach, Germany

SKILLS

- Android SDK
- Kotlin
- Java
- C++
- JavaScript, Vue.js
- Jetpack Compose
- Coroutines / Flow / LiveData
- MVVM, Clean Architecture
- Async Programming
- Material 3
- Jetpack Libraries, Retrofit, Room
- Dagger Hilt, Koin (DI)
- Spring Boot, Ktor
- ASP.NET Core, C#
- Entity Framework Core
- PostgreSQL
- Kotlin Multiplatform
- Git, Docker
- AWS Cloud, Firebase
- REST API, GraphQL
- JSON / YAML / XML
- Gradle / Maven
- Pull Requests
- Agile / Scrum

PROFILE

With several years of professional experience in mobile development, I have led and contributed to multiple projects. I consistently take ownership of architectural decisions, applying clean architecture and clean code principles to deliver robust, scalable, and maintainable mobile solutions. I am now extending my expertise with Backend systems, Kotlin Multiplatform and AWS Cloud.

WORK EXPERIENCE

Senior Android Developer / C# Developer January 2025 - January 2026

GastroSoft GmbH - Krefeld

Achievements/Tasks

- Led the development lifecycle of a modern cloud-connected mobile POS solution for Android, featuring offline-first architecture, integrated payment processing, automated database backups, and thermal receipt printing.
- Implemented C# APIs using ASP.NET Core and EF Core, designed GraphQL schemas using HotChocolate to support mobile frontends.

Tech: Kotlin, Jetpack Compose, MVVM, Room, Coroutines, Dagger Hilt, Firebase, Crashlytics, Git, Azure Pipelines, C#, ASP.NET Core, EF Core, GraphQL

Android Developer

March 2022 - September 2024

Veeuze GmbH - Remote / Wesel

- Architected and maintained specialized Android applications for interior design, leveraging ARCore and 3D visualization to enhance user experience.
- Integrated multiple BLE-based color sensor devices, enabling real-time color scanning of walls/objects.
- Implemented UI tests and Unit tests to ensure codebase quality.

Tech: Java, Kotlin, MVVM, Compose, Bluetooth BLE, REST APIs, Retrofit, ARCore, 3D/AR, Navigation Component, Coroutines, Gradle, Espresso/Junit, Git.

Android Developer

October 2020 - December 2021

Chari.ma - Tanger

- Development and full redesign of a large-scale B2B E-commerce app for consumer goods, built a dynamic product catalog and an offers banner.
- Built a customized delivery tracking application with Google Maps API integration for real-time driver navigation, package management and administrative monitoring dashboards.

Tech: Java, Kotlin, MVP, MVVM, Retrofit, Google Maps, REST APIs, Flutter, Git.

Junior Java J2EE-Developer

February 2020 - July 2020

VirtuoCode - Remote / Tanger

- Developed a SaaS platform designed for business model evaluation and strategic support for startups in managing advertising campaigns.

Tech: Java, Spring Boot, MVC, Hibernate, MongoDB, Docker, JavaScript.

LANGUAGES

German - C1 level (fluent)

English - C2 level (fluent, EF SET Certificate)

Arabic - Native

French C2 level (fluent, first foreign language)

SKILLSET

Operating systems:

- Linux OS: Advanced knowledge
- Windows OS: Advanced knowledge

Programming languages:

- Kotlin, Java: Advanced knowledge
- JavaScript, Tailwind CSS: Good knowledge
- .NET, C#: Good knowledge
- C++: Basic knowledge

Markup languages:

- JSON, YAML, XML: Advanced knowledge
- HTML: Advanced knowledge

Databases:

- PostgreSQL, MSSQL: Good knowledge
- MongoDB: Good knowledge

Cloud & CI/CD

- AWS Cloud, Firebase: Good knowledge
- Bitrise, GitHub Actions: Good knowledge

Tools & Automation:

- Shell Scripting: Good knowledge
- Docker, Python : Good knowledge

Agentic AI:

- Cursor, Claude Code: Good knowledge
- Copilot, Gemini Agent: Good knowledge

IDEs:

- Android Studio, IntelliJ IDEA, VSCode, Visual Studio: Advanced knowledge

Networking & Web APIs

- REST API, GraphQL: Advanced knowledge
- OpenAPI: Good knowledge

Build management :

- Gradle, Maven: Advanced knowledge

Version Control:

- Git: Advanced knowledge

EDUCATION

MASTER OF SCIENCE

September 2018 - July 2020

(MSc) Faculty of Science and Technology, Abdelmalek Essaâdi University, Computer and Mobile Systems

Two-year master's program - Focus Areas: Mobile & Cloud Systems.

BACHELOR OF SCIENCE

September 2014 - July 2018

(BSc) Faculty of Science and Technology, Abdelmalek Essaâdi University, Mathematics and Computer Science

Four-year bachelor's degree program - Focus Areas: OOP, Linux and databases.

CERTIFICATIONS

- AWS Certified DevOps Engineer Professional Course (July 2026)
- AWS Certified Developer - Associate (July 2026)
- Google AI Professional Certificate (March 2026)
- Backend Developer with AIESEC Morocco as a volunteer (February 2021)
- IBM Cloud Application Developer (September 2020)
- DevOps Essentials Professional Certificate (July 2020)
- EF SET English Certificate: C2 Level (May 2020)
- IoT Cloud Developer Mastery Award (October 2019)
- IBM Application Security Engineer Mastery Award (May 2019)
- Android Development Udacity Track (November 2018)

PROJEKTE

Smart Embedded Alarm System (Arduino-based) for Motion Detection with Real-time Mobile Notifications

Tech: C language, Arduino UNO, ESP8266, ThingSpeak, Motion sensor, Pushbullet, ThingHTTP

Implementation of a Linux mini-Shell Using the C Language for UNIX Systems

Tech: C language, Bash, gcc, Nano editor, Ubuntu 16.04 LTS

Implementation of a Decentralised Web Application for a Survey System based on the Ethereum Blockchain

Tech: Solidity, Ethereum-Blockchain, Smart Contracts, Truffle, React, Web3.js, Node.js, Express Framework, MetaMask

Development of a Cross-Platform Mobile App for Highway Maintenance Management Using Flutter, Google Maps and Firebase

Tech: Flutter, Google Maps, Firebase, OAuth, Social Login, BiometricPrompt API
